

LIVEFIRM
CONSTRUCTION (N.I.) Ltd

ENVIRONMENTAL POLICY

Livefirm Construction (N.I.) Ltd is committed to improving our environmental performance and promote environmentally sustainable products, services and solutions to our employees, clients and consumers.

We recognize that our role as a responsible corporate citizen is to mitigate and prevent pollution and protect the environment and community from impacts which may arise from our activities. Livefirm requires all employees, suppliers and contractors to be aware of their responsibilities and to conduct operations in a manner which actively supports implementation of this policy.

We will conform with ISO 14001:2015 and comply with all relevant compliance, legal, regulatory and statutory requirements.

Our approach to achieving this policy commitment is as described:

Sustainable Procurement

We will identify opportunities in our supply chain to promote certified sustainable products, services and alternative solutions with our clients, suppliers and customers.

Energy & Climate Action

We will identify opportunities to reduce our operational energy consumption and direct emissions, seek alternatives and promote innovative solutions with our clients.

Water Quality & Conservation

We will target reductions in portable water consumption and promote solutions to recover treat and reuse process wastewater and effluents discharged by our operations.

Resource Recovery & Waste Avoidance

We will target reductions in waste-to-landfill, increase resource recovery and recycling rates by promoting alternatives and innovative technology solutions.

Natural Environment

We will address our impacts in biodiversity and prevent pollution of the natural environment by promoting awareness, conservation and programs which restore degraded ecosystems.
